

Anja Mullin

I've been working for the City of Kirkland for over 10 years. I started as an Administrative Assistant in the Finance Department. In this position I was able to get valuable experience with City budgeting as a budget coordinator as well as experience in interpreting the AFSCME contract as a timekeeper. In 2006 I took a temporary position as a Business Analyst, also in the Finance Department. This position has given me an opportunity to work with employees in every department within the City as we implement the City's records management software.

My membership in AFSCME started with my employment at the City. Since then I have served first as the Recording Secretary, and most recently as the Vice President. I have gone through AFSCME's Steward's training. I sat at the table during our most recent contract negotiations. And I participated in the candidate interviews for the most recent council election. Also during this past year I have worked at developing our Union's relationships with the incoming councilmembers, as well as working to continue our positive relationships with the mayor and other sitting councilmembers.
